

PSQM transforms primary schools and communities - growing confident leaders and teachers of science, building children's attainment and aspiration in science, and shaping the culture of a primary school into a place where every child, teacher and family thinks 'science is for them'.

Primary Science Quality Mark is a one-year school improvement programme for primary science, which provides professional development for around 600 new and experienced subject leaders each year. PSQM enables confident, knowledgeable, reflective leadership which results in an improvement in the way in which science is strategically planned and taught across the whole school.

We are delighted to announce that in June last year we received the news that, as a school, we had achieved this award.

"The PSQM process definitely raised the profile and value of science across the school. It provided opportunities for the staff as a whole to reflect on current practice and what we wish to achieve. It developed my skills as a leader and provided transferrable skills on how to lead a subject/area across the school." Mrs Heywood

As a school we will be continuing on our Science journey. Watch this space!
